

Mass

The main unit of MASS / WEIGHT is the *gram (g)*. We can also use the *kilogram (kg)* for heavier objects.

$$1000 \text{ grams (g)} = 1 \text{ kilogram (kg)}$$

The appropriate unit to use for different items

<i>Kilogram</i>	<i>Gram</i>
Fish in the market	A lime
Vegetables	A pen
A bag of flour	A watch
A 10 yr old child	A pack of nuts
A television	A copy book
A brick	A table spoon

The block weighs 1Kg, as the scale is balanced
