Angles
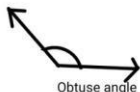

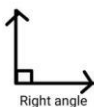

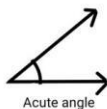

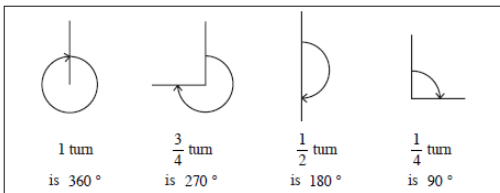

An <mark>angle</mark> *is formed when two lines meet at a common point. It is measured in* <mark>degrees</mark> *and it is considered the* <mark>amount of turn</mark>.

1 turn	$\frac{3}{4}$ turn	$\frac{1}{2}$ turn	$\frac{1}{4}$ turn
is 360 °	is 270 °	is 180 °	is 90 °

Acute angle   Right angle   Obtuse angle

Reflex angle
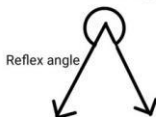

Straight angle

Acute angle	Less than 90°
Right angle	Exactly 90°
Obtuse angle	Greater than 90° less than 180°
Straight angle	Exactly 180°
Reflex angle	Greater than 180° less than 360°
Full angle	Exactly 360°
